

September 15, 2014

My name is Gina Satterfield of Helena, MT. Good afternoon to the Interim Education Review Committee. This statement that I am reading today, is the same statement given to the Montana Board of Public Education on September 11, 2014. In memory of all victims of 9/11 we are still fighting terrorism from within.

Does anyone recognize the name of John Ayers? He is the brother of Bill Ayers, homeland terrorist and co-founder of the Weather Underground Organization, he is a self proclaimed radical communist and admits to being fond of Karl Marx and Mao Zedong. He is the co-author of the Chicago Annenberg Challenge grant proposal that in 1995 won \$49.2 million dollars over a 5 year period for public school reform that gave birth to Bill's very own "Small Schools Movement" or "Small Schools Initiative" and the political Marxist-Communist, moral, and social ideology expansion of the Coalition of Essential Schools (CES) that has dropped the bomb of CScope and Common Core on our nation, but this is just smoke and mirrors as brother John skips off to Louisiana to set up shop as Director of the Cowen Institute at Tulane University and gets ready to take advantage of a crisis named Katrina. John is a participant on behalf of the business groups pushing for local control and then later for the charter school movement that mimics the local control and small schools approach by brother Bill and his Chicago community organizing cronies. By the way, Bill Ayers is "The Pusher" with a Masters in brainwashing of Early Childhood Education that is coming to Montana and reaching for your wallet. Way to go Governor Bullock!!! Let's go back and ask, "Why are the republicans and their tax exempt foundations screaming for "choice" and charter, if the Ayers brothers are behind the curtain?" President Obama, Arne Duncan, republicans, democrats and the Council of Foreign Relations all agreed on "choice" through the Reauthorization of the Elementary and Secondary Education Act of 2013 and it's overview and Blueprint of Reform, which is the complete takeover of "choice" and charter. Charter schools do not have elected boards, they have appointed council and "choice" does

not mean a choice in curriculum, it really means the individual/student can go to a public, private or home school and they all receive the same education. The federal tax dollars will fund the individual/student and follow them forever across county and state lines. This is regionalism=communism as it leaves you with skyrocketing taxes. Got Property? Now, stir some Amnesty into that recipe of disaster and let's see who wants to lick that stick?!!! You first Governor Bullock.
